Product Introduction

GLA-00804A is a gallium arsenide single-chip amplifier operating at 0.8-4GHz. The noise figure of this amplifier is 0.7dB and can provide a gain of 33dB, with a P-1dB output power of +14dBm. The chip adopts an on chip through-hole metalization process to ensure good grounding, without the need for additional grounding measures, making it simple and convenient to use. The back of the chip has undergone metalization treatment, suitable for eutectic sintering or conductive adhesive bonding processes.
